I _____ ③⑤ _____ ③⑥ _____ yesterday during the math class.

Ⅴ 英文を読み、質問に対して最も適当なものの記号を○で囲みなさい。

An elderly grandmother who chats about knitting patterns, recipes for scones and the blackness of the night sky to anyone who will listen has become an unlikely tool in combatting scammers.

Like many people, "Daisy" is troubled with countless calls from fraudsters, who often try to take control of her computer after claiming she has been hacked. (㉟) because of her hesitation and inquiries about whether they like cups of tea, the criminals end up furious and frustrated rather than successful. (㊿), Daisy is not a real grandmother, but an AI bot created by computer scientists to combat fraud. Her task is simply to waste the time of the people who are trying to scam her.

The AI company, O2, launched "AI granny" Daisy for a short period to show what could be done with artificial intelligence to counter the problem of scammers that has become so common. By acting unsure, pretending not to understand computers, and wanting to talk about her past, 78-year-old Daisy makes the phone scammers frustrated and impatient.

In one call O2 released, a scammer tries to take control of her computer (㊿) telling her it is riddled with viruses. He is kept on the line while she looks for her glasses and has difficulties turning on the machine and finding the Internet Explorer icon. "You know, back in my day we didn't have all this technology. Everything was much simpler. What about you, dear?" she says. When he reacts with anger, saying that her "profession is bothering people", Daisy says: "I wouldn't want to bother anyone. I'm just trying to have a little chat." Another call has a scammer again trying to take control of her computer, but Daisy delays by talking about how she usually just uses it for knitting patterns and recipes for scones. "I see a lot of options, dear. It says things like back, forward, reload and, oh, what's this? Save as. How do I find the homepage?" she asks. (㊿) a third scammer tries to get her to download the Google Play Store, she replies: "Dear, did you say pastry? I'm not really on the right page." She then complains that her screen has gone blank, saying it has "gone black like the night sky". "If you are wasting our time, ma'am, you are going to lose your money because someone is trying to take your money and we are trying to upgrade your security," says the frustrated scammer. When she tries to find the icon, the scammer is asking her to press, she says: "I see a triangle icon, but I'm not sure if it's the right one. It could be a slice of pie. You know, my eyesight isn't what it used to be. Let me just look closely at it." "Do you have any lovely pastries in your area? I do adore a good scone," she adds.

Behind the friendly "hoping to" is an AI system which has been trained on real scam calls, said the marketing director.

* A "scammer" is someone who tries to trick people to steal their money or personal information.

* Fraudsters are similar to scammers, but the word "fraudster" often refers to more serious or organized criminal activity.

Va 下線㉗～㉔に当てはまる語を選び、記号で答えなさい。ただし、大文字で始めるべき語も小文字にしてある。

(A) but (B) after (C) when (D) of course

Vb
